Hollymatic Patty Machine

What is a patty machine?

A patty machine is a specialized kitchen appliance designed to streamline the process of making patties or burger patties. It is commonly used in restaurants, fast food chains, and food processing facilities. The machine is equipped with a mold or plate that shapes the ground meat into uniform patties of a specific size and thickness. This ensures consistency in the size and shape of the patties, making them ideal for commercial food preparation. The patty machine is easy to use, efficient, and helps save time and effort in the patty-making process.

Hollymatic Super 54

The Hollymatic patty machine is a reliable and efficient solution for forming patties of up to 8oz with precise size, weight, and shape. With the ability to produce up to 2,100 patties per hour, this machine ensures consistent portion control for your food production needs. The automatic paper interleaving system adds convenience and efficiency to the process. Additionally, the mold plate changes are simple and fast, allowing for seamless transitions between different patty sizes. The stainless steel stand provides durability and hygiene, making it a valuable addition to any food processing operation.

Hollymatic Super Forming and Portioning Machine

FORMS AND PORTIONS A WIDE VARIETY OF PRODUCTS INCLUDING MEAT, POULTRY, SEAFOOD, VEGETABLES, BAKERY ITEMS AND MORE.

There's a good reason why the Hollymatic Super is found in more restaurants, supermarkets, drive-ins, small locker plants, and institutions than any other patty machine. The Super is an industry favorite for producing high quality patties. It's the most popular patty machine ever built.

- ▶ Forms patties up to 8 oz. in weight, from $\frac{1}{16}$ " to $\frac{1}{4}$ " thick. (1" optional)
- ▶ Exact and consistent size, weight, and shape.
- ▶ Produce up to 2,100 patties per hour with reliable portion control.
- ▶ Automatic paper interleaving system.
- ▶ Safety Interlocked.
- ▶ Mold plate changes, simple and fast.
- ▶ Fast, easy clean-up with one tool disassembly.
